

Heart Disease Analysis using Tableau

TEAM ID	SWTID-2026-8531
PROJECT TITLE	Heart Disease Analysis using Tableau
MAX MARKS	3 MARKS

3.4 – Technology Stack

Hardware Requirements

- **Processor:** Intel Core i5 Processor or higher
- **RAM:** 16 GB
- **Storage:** 256 GB SSD
- **Display:** Minimum 1366 × 768 screen resolution
- **Internet Connection:** Required for software installation, updates, and online resources

Software Requirements

- **Tableau Desktop** – For data visualization and dashboard development
- **XAMPP** – For local server and database management
- **MySQL Workbench** – For database design, querying, and data management
- **Python** – For data preprocessing and analysis
- **PyCharm** – Integrated Development Environment (IDE) for Python development
- **Git** – Version control and project collaboration
- **Operating System:** Windows 10/11 (64-bit)

Technology Stack

Layer	Technology
Data Source	Heart Disease Dataset
Database	MySQL
Database Management Tool	MySQL Workbench
Data Processing	Python
Development Environment	PyCharm
Visualization Tool	Tableau Desktop
Local Server	XAMPP
Version Control	Git
Reporting & Analytics	Tableau Dashboards

Tools Used:

- Tableau Desktop
- MySQL Workbench
- XAMPP
- Python
- PyCharm
- Git.
