

Heart Disease Analysis using Tableau

TEAM ID	SWTID-2026-8531
PROJECT TITLE	Heart Disease Analysis using Tableau
MAX MARKS	1 MARKS

5.3. Project Progress Tracking

Phase	Activity	Status
1	Smart Bridge Live Sessions (18 Days)	Completed
2	Data Collection	Completed
3	Data Connectivity	Completed
4	Data Preparation	Completed
5	Data Analysis	Completed
6	Dashboard & Story Creation	Completed
7	Tableau Public Upload	Completed
8	Web Integration	Completed
9	Documentation	Completed
10	Demo Video Creation	Completed
11	Project Deployment	Completed

Phase 1: smart Bridge Live Sessions

Completed 18 days of Tableau training and project guidance.

Phase 2: Data Collection

Collected the heart disease dataset.

Phase 3: Data Connectivity

Connected the dataset to Tableau.

Phase 4: Data Preparation

Cleaned and organized the data.

Phase 5: Data Analysis

Analysed the dataset using Tableau.

Phase 6: Dashboard & Story Creation

Created interactive dashboards and stories.

Heart Disease Analysis using Tableau

Phase 7: Tableau Public Upload

Published dashboards on Tableau Public.

Phase 8: Web Integration

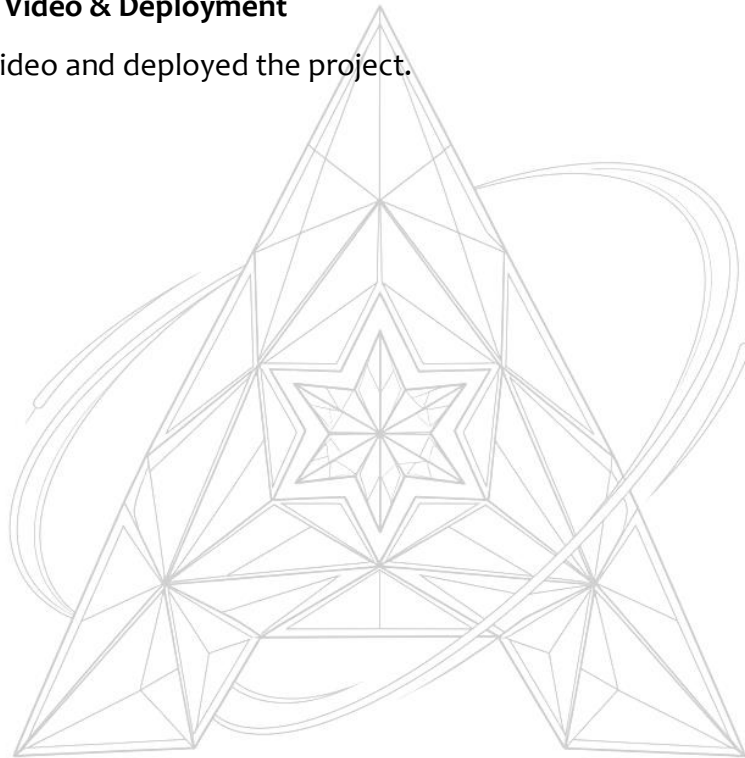

Integrated dashboards into the Flask website.

Phase 9: Documentation

Prepared project report and diagrams.

Phase 10: Demo Video & Deployment

Created demo video and deployed the project.
