

Heart Disease Analysis using Tableau

TEAM ID	SWTID-2026-8531
PROJECT TITLE	Heart Disease Analysis using Tableau
MAX MARKS	3 MARKS

6.2 – Data Connectivity

Step 1: Open MySQL Workbench

1. Launch MySQL Workbench.
2. Connect to your local MySQL server running through XAMPP.
3. Select the demo schema from the Navigator panel.

Step 2: Start the Data Import Wizard

1. Expand the demo schema.
2. Right-click on Tables.
3. Select Table Data Import Wizard.

Step 3: Choose the Dataset

1. Browse and select the heart.csv file.
2. Click Next.

Step 4: Configure Import Settings

1. Choose Create a New Table.
2. Enter the table name:
 - heart
3. Review the column names detected from the CSV file.
4. Verify that the data types are assigned correctly.
5. Click Next.

Step 5: Import Data

1. MySQL Workbench displays a summary of the import process.
2. Click Next to start importing the data.
3. Wait until the import completes successfully.

Step 6: Finish the Import

1. A success message will appear showing the number of records imported.

Heart Disease Analysis using Tableau

2. Click Finish.
